

Plug-in Activation Instructions

1 Plug-in Activation

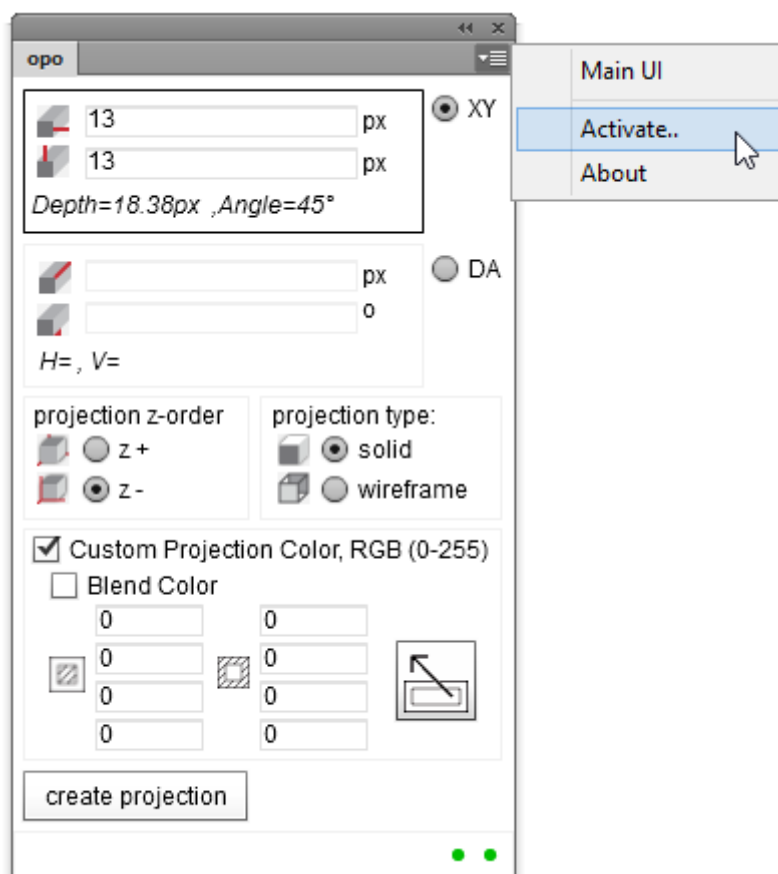

1.1 Activation File *.ec

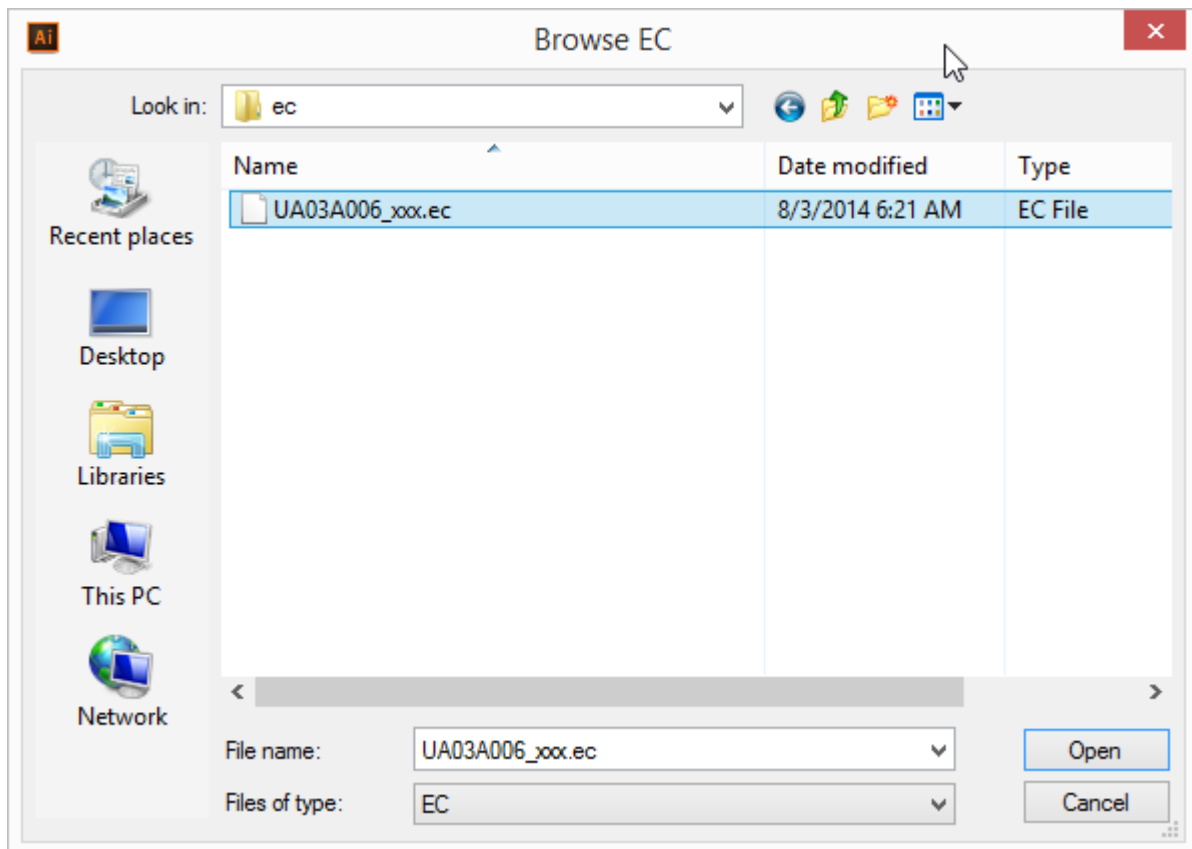

Prepare the activation file you received:

[Order ID]_xxx.ec

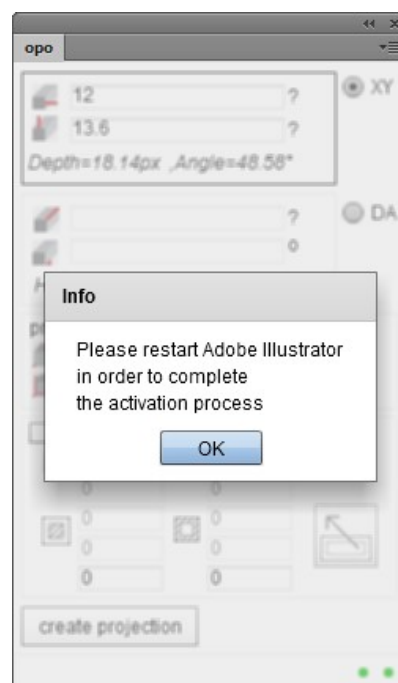

1.2 Activating

Go to the *Plug-in Panel* > *Menu* > *Activate...* and browse your *[Order ID]_xxx.ec* file

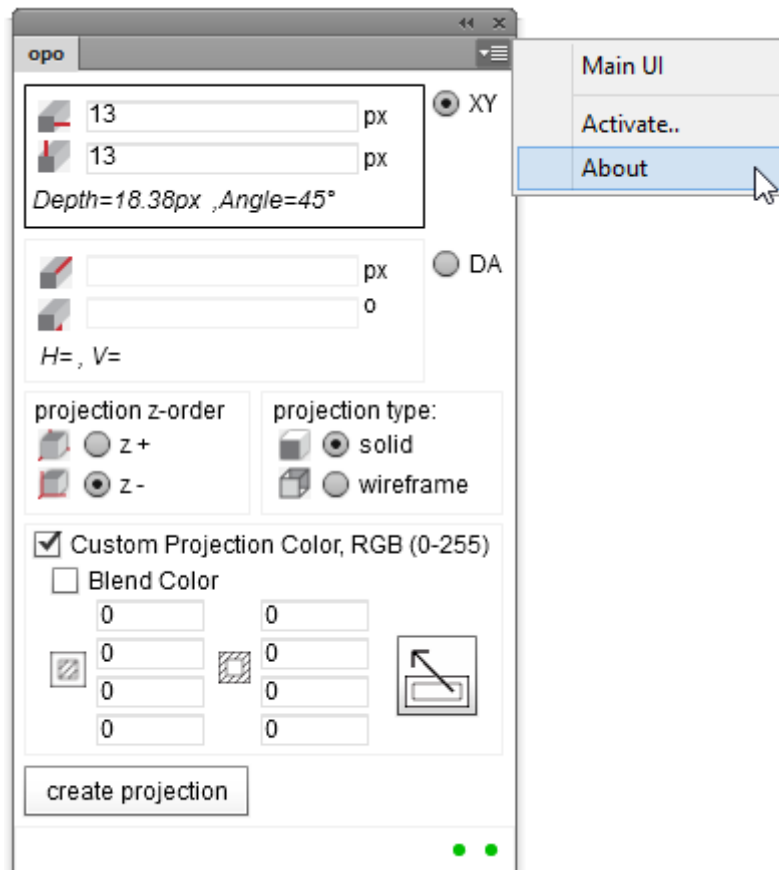

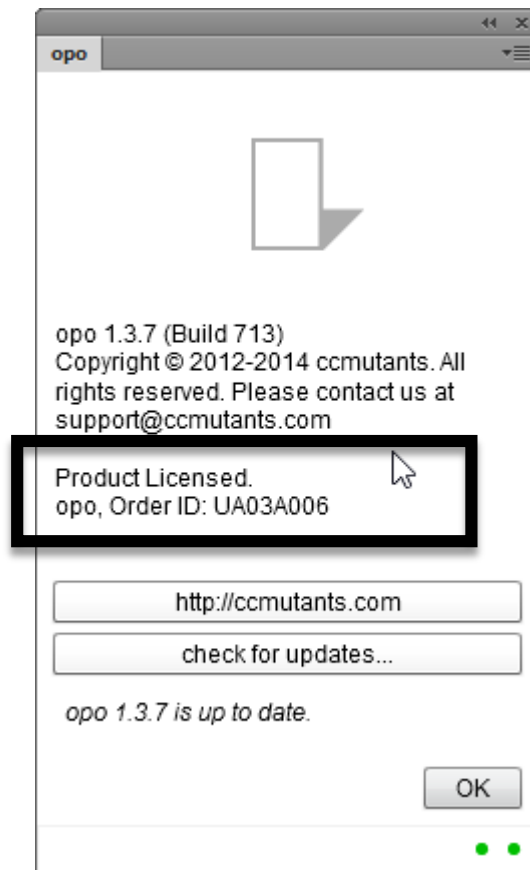

Plug-in prompts you to restart your Adobe® Illustrator® session in order to complete the activation process.

2 Successful Installation

After restart, go to the *Plug-in Panel* > *Menu* > *About*. The 'Product Licensed...' message should be displayed:

NOTE:

If you work with different versions of the Adobe® Illustrator® software: 16.0 (CS6), 17.0/17.1 (CC) or 18.0 (CC 2014), *32 or 64-bit* you don't need to perform separate activations on them! It works globally. For example, you can activate your *Plug-in* under Adobe® Illustrator® 18.0 (CC 2014) and this will automatically apply activation file to the 16.0 (CS6) and 17.0/17.1 (CC) versions as well.

That's it!
